Participation certificate for all

Rules

Students of classes 8th, 9th and 10th are eligible to participate in the quiz.

A school can send maximum 10 students.

The quiz has two rounds, i.e. First round and the final round.

In the first round, there are 16 questions.

It is a written round.

In this round, there are multiple choice questions. You have to state the right answer.

This is an individual quiz. There are no teams.

Answers are checked within 15 minutes and the top 10 students go to the next round. It is purely based on meritocracy.

In case there are more than 10 students who score more than the threshold limit, a subsequent round will be played to select only 10 students for the final round.

Final Round

Only the top ten students from the first round play this round.

Two or more students from the same school can also represent the school in this round.

It is the fastest finger first round. The one who can answer the question first wins points. Each question is 10 points.

Wrong answer gives -5 to the student.

There are ten questions. At the end of the round, the student with maximum points wins the quiz. Similarly, the second and the third prize is given accordingly.
